I. Introduction and Purpose of Charrette

The City of Sacramento (City) is pleased to have the opportunity to participate in Lambda Alpha International (LAI) Land Economics Weekend through the LAI Special Charrette. As a large City, we have many land use issues that this charrette could have focused on, however, we have a significant asset that we have not been able to fully capitalize on yet: the waterfront along the Sacramento River. As you will read in the following pages, the City has set the vision of revitalizing the waterfront and creating a regional destination. But the City has been unsuccessful in getting the majority of the riverfront projects to the construction/implementation phase.

We hope to leverage the LAI members collective expertise to help the City move past the visioning stage and create a destination waterfront.

The Sacramento River urban waterfront is three and a half miles in length stretching from Tiscornia Park, at the confluence of the Sacramento and American Rivers, to Miller Park.

Over the past 40 years, the City's riverfront has been included in numerous specific plans including the River District Specific Plan, Railyards Specific Plan, Central City Specific Plan, Docks Area Draft Specific Plan, and the West Broadway Specific. In California, a Specific Plan is a planning document that implements the goals and policies of the General Plan. These plans contain detailed development standards and implementation measures to which future projects located within a specified geographic area must adhere. A Specific Plan is a popular form of a land use overlay.

In 2003, the Cities of Sacramento and West Sacramento collaborated on a Riverfront Master Plan with the goal of creating one of the nation's finest urban waterfronts. The Riverfront Master Plan encompasses the riverfront properties in each of the Specific Plans listed above. The Master Plan contains four guiding principles:

- 1. Creating riverfront neighborhoods and districts;
- 2. Establishing a web of connectivity;
- 3. Enhancing the green backbone of the community; and,
- 4. Creating places for celebration.

Unfortunately, the vision has not been implemented as quickly as anticipated and the Sacramento side of the river remains largely unchanged.

These plans have produced consistent recommendations for riverfront projects. We've realized the question is not so much what to do, but where to focus and how to accomplish it.

Specific Plan Areas Along the Waterfront

For the purposes of this charrette, we will divide the riverfront by the City's five specific plan areas bordered by the Sacramento River, however, the charrette will focus on the River District, Railyards and Central City Specific Plan Areas. These areas are also overlayed with the Riverfront Master Plan:

River District Specific Plan

Located along the confluence of the American and Sacramento Rivers, the <u>River District</u> is home of a wide variety of businesses and residential housing.

Railyards Specific Plan

Located just south of the River District, the Railyards Specific Plan area is the largest infill opportunity in the western United States. When built out, it will include employment opportunities, cultural destinations, and residential neighborhoods. The Railyards also abuts the Sacramento River.

• Central City Specific Plan

Located in the heart of the City, the Central City Specific Plan focuses on maintaining the quality of life in the central city by developing varied housing stock. The Old Sacramento Waterfront is on the west side of Central City Specific Plan, providing residents and workers with a connection to the Sacramento River.

Sacramento Docks Area Draft Specific Plan

The waterfront area, along the Sacramento River, holds tremendous potential for future development opportunities. The Docks Area Specific Plan was incorporated into the Central City Specific Plan.

• West Broadway (formerly Northwest Land Park) Specific Plan

The WBSP will help create a more walkable neighborhood and improve multimodal connectivity. By increasing housing opportunities near the urban core, it will help reduce long commutes and

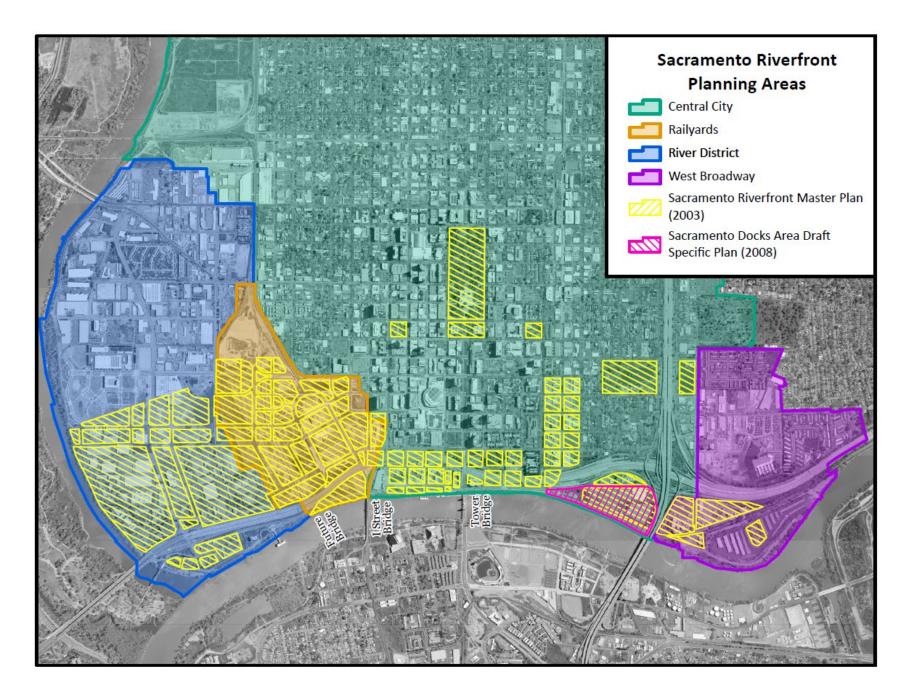

dependence on cars, reduce the per capita use of fossil fuels and greenhouse gas emissions to help meet air quality standards.

This briefing packet contains summary information on each of these areas in the Urban Sacramento Waterfront – Setting and Context section. The City's efforts have recently focused on Old Sacramento Waterfront and the Destination Sacramento Program (within the Central City Specific Plan) consisting, in part, of three capital improvement projects: Front Street Experience, the Sacramento History Museum Event Deck and the River Docks. For various reasons (See Section I of this document) the City has been unable to move forward on these projects.

The briefing packet also contains information transportation and connectivity, historical background information and resources.

Docks and West Broadway Specific Plan Areas (Not part of the Charrette)

The Docks and West Broadway Specific Plan Areas have a number of environmental, financial and existing facilities that make these areas very long-term projects. For the purposes of this charrette, the City would like to focus on River District, Railyards, and Central City Specific Plans. Additional information on the Docks and Northwest Land Park is provided in Section 3.

Purpose of Charrette and Key Questions

The City of Sacramento is requesting LAI's assistance in prioritizing our waterfront work. The City has a very comprehensive and complex program envisioned for the waterfront. But, it is not clear about the implementation and financing strategies needed to bring it about. Our charrette focus is on providing guidance to help us establish these strategies.

The big questions are related to prioritization of:

- Money
- Staff Time
- Regulatory powers
- Legislative powers
- Partnership efforts.

Specifically, the charrette questions are:

How might we best go about financing and implementing our highest waterfront priority, the Destination Sacramento Program, by prioritizing all or portions of the following projects and strategizing their funding and funding sources -Front Street Experience, Event Deck, and River Docks

What private and public projects discussed in the other waterfront districts would best help to stimulate waterfront development, and should represent high priority for support by the City? Can we envision a strategic linkage between them?

What are the most important connections to be enhanced or developed between the waterfront districts and the adjacent areas to enable the physical aspects of this linkage. Is there a logical priority?

2. Sacramento's Urban Waterfront

The waterfront contains a growing number of commercial, civic, and cultural amenities, as well as some constraints, briefly described here:

City of Sacramento

Sacramento occupies nearly 100 square miles at the confluence of the Sacramento and American rivers. With a population of near 500,000, it is the seventh-largest city in California. As one of the most historic cities in California, Sacramento boasts an impressive array of landmarks, parks, amenities and other must-see points of interest.

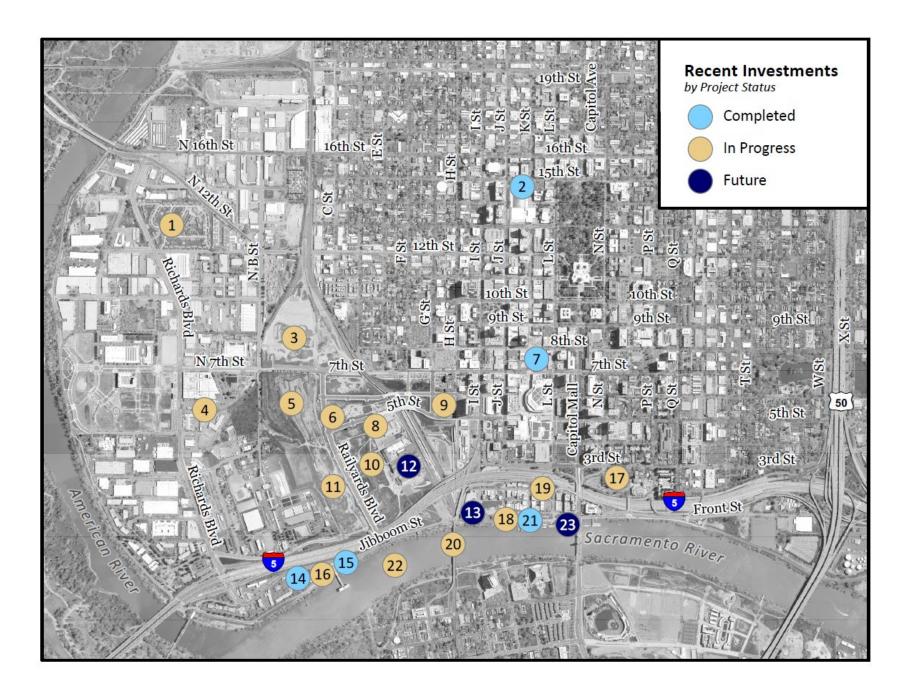

The City has had significant public and private investments along the waterfront and within the surrounding specific plan areas. The table and map on the following pages provide a summary of recent projects. For the purposes of this exercise, completed projects are projects that are fully constructed or are an approved planning document, in progress projects are projects that are in the design stage but may not be fully funded, future projects are projects that have been identified to be constructed in the future but do not have funding or design completed.

Tower Bridge and Old Sacramento Waterfront

Summary of Recent Investments by Specific Plan Area

	Specific Plan Area	Riverfront Master Plan Project	Project	Status	Investment Type	Cost
1	River District		Marisol Village	In Progress	Public	\$30 Million
4	River District		State Office Complex	In Progress	Public	\$1 Billion
14	River District	Yes	MOSAC	Completed	Public	\$50 Million
15	River District	Yes	Matsui Park Phase I	Completed	Public	\$400,000
16	River District	Yes	Hanami Line	In Progress	Public/Private	\$4 Million
22/22	Railyards	Yes	I Street Bridge Replacement/Deck Project	In Progress	Public	\$220 Million
8	Railyards		Live Nation	In Progress	Private	
11	Railyards		Kaiser Hospital	In Progress	Private	\$1.4 Billion
3	Railyards		MLS Soccer Stadium	In Progress	Private	\$300 Million
9	Railyards		Sacramento County Courthouse	In Progress	Public	\$515 Million
5	Railyards		Housing	In Progress	Private	
10	Railyards		Central Shops	In Progress	Private	
12	Railyards		State Rail Tech Museum	Future	Public	\$80 Million
3	Railyards		Infrastructure Improvements	In Progress	Public	\$30 Million
18	Central City	Yes	Destination Sacramento – Front Street	In Progress	Public	\$40 Million
13	Central City	Yes	Destination Sacramento – Museum Roof Deck	Future	Public	\$5.5 Million
23	Central City	Yes	Destination Sacramento – River Docks	Future	Public	\$17.5 Million
19	Central City	Yes	Old Sacramento Lighting and Safety Improvements	In Progress	Public	\$5 Million
21	Central City	Yes	Embarcadero	Completed	Public	\$8 Million
2	Central City		C3 Project	Completed	Public	\$350 Million
17	Central City		Crocker Park	In Progress	Private	\$40 Million
7	City		The Hardin (mixed use project)	Completed	Private	\$61 Million

River District Specific Plan Area

River District and Confluence of the American and Sacramento Rivers

Through the early 1900's, the area now known as the River District was subject to flooding and drainage problems. As new levees were constructed, the area became a focus for warehousing and distribution due to its proximity to major water, rail and road arteries that could distribute the agricultural products of the fertile Sacramento Valley throughout the nation.

In the early 1920's, the City of Sacramento constructed the water filtration plant that is located in the western portion of the area, adjacent to the Sacramento River.

In 1928, the California Cooperative Producers Company built a tomato cannery in the area. That plant was later bought by Thomas S. Richards, Sr. who, together with landowners Henri and Peter Bercut, formed the Bercut-Richards Packing Company. It became the largest independently owned cannery in California.

During World War II, the Federal government constructed the Dos Rios (now Twin Rivers) housing complex and in 1952, a printing plant was developed at North 7th and North B streets to serve the State government. The area was annexed to the City of Sacramento in the 1950's and early 1960's.

Completed Projects

River District Specific Plan

Adopted in 2011, the River District Specific Plan envisions a vibrant, mixed-use community connected to the surrounding neighborhoods by a network of local streets, light rail transit, and bicycle and pedestrian pathways.

The River District will be bordered by a ribbon of parks at the river's edge and have a wide range of employment, entertainment and housing options for families and individuals. It will be home to existing commercial and light industrial uses and to new development as it transitions to a mix of residential, office, retail and commercial infill.

With the American and Sacramento rivers serving as defining features, the redevelopment of this former industrial district will embrace its rivers, creating both economic and social benefits for the region.

River District Land Use Map

Sacramento Museum of Science and Curiosity (MOSAC)

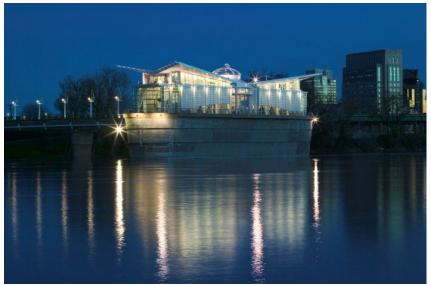

Museum of Science and Curiosity (MOSAC)

The new <u>MOSAC</u> revitalized the historic PG&E power station—listed on the National Register of Historic Places—and incorporates Robert T. Matsui Waterfront Park into a dynamic new campus on the Sacramento River.

Matsui Park

<u>Robert T. Matsui Waterfront Park</u> is located along Sacramento River Parkway bicycle trail that connects Old Sacramento to Tiscornia Park. It is directly south of MOSAC.

Sacramento Intake Structure. It has two main functional requirements—to supply water at a capacity of 160 million gallons per day and to ensure the associated fish screens would meet current regulatory agency requirements. The facility has been in operation since 2004

The park includes the

Matsui Park and the Water Intake Structure

Pending Projects

Hanami Line

The Hanami Line is proposed to be located at Matsui Park. The Hanami Line celebrates Sacramento's cultural connections with Japan — through the planting of over 200 cherry trees. The enhanced park will offer an inviting environment for a relaxing riverfront experience. In the spring, the celebration of the cherry blossoms will shine a spotlight on the City's award-winning urban forest.

The Hanami Line is in the funding stages and construction is expected soon.

There are no other major projects proposed or under construction in the River District at this time.

Future Projects

Confluence/Jibboom Street

The Jibboom Street area is adjacent to the confluence of the American and Sacramento Rivers. Tiscornia Park is located at the confluence of the rivers and has a sand beach for swimming.

The vision for this area is to create a destination for tourists and other visitors, with a concentration of hotels, restaurants, entertainment venues and a vibrant parkway. The area is expected to retain its service commercial uses, catering to the traveling public. Buildings along the Sacramento riverfront are expected to take advantage of the view of the river through increased height and convenient riverfront access. The City of Sacramento has been working towards helping the owners of the existing motels convert their facilities to uses that take advantage of the waterfront location.

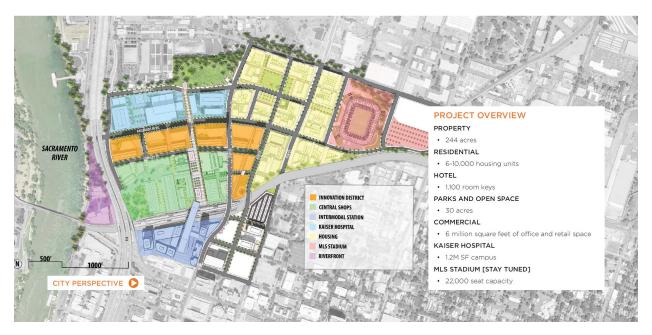

Railyards Specific Plan Area

Once serving as the western terminus of the 1860s Transcontinental Railroad, today the Railyards is one of the nation's largest infill redevelopment projects. Located just north of Downtown and South of the River District, the historic 244-acre former Union Pacific site will integrate the area into the existing Central City. The Railyards project will connect with Sacramento's downtown office, retail, tourism, residential, and government centers to essentially double the size of Downtown Sacramento. The Railyards project includes future dense urban residential neighborhoods, a historic museum, a shopping and market district, a regional intermodal transit station, a county courthouse, a medical campus, a soccer stadium, pedestrian-oriented streets, shopping and entertainment complexes, riverfront access, and high-rise mixed-use buildings.

Completed Projects

Railyards Specific Plan

The <u>Railyards</u> is the nation's largest infill development project, consisting of 244- acres of historically significant land in the heart of Sacramento's downtown. A goal of the Specific Plan is to create a sustainable and thriving mixed-use urban community. The Railyards is generally owned by the Master Developer, LDK Ventures.

Railyards Land Use Plan

Pending Projects

Major League Soccer Stadium

The Railyards will include the development of a Major League Soccer stadium that will accommodate approximately 20,000 sport or concert attendees. The stadium venue offers the opportunity for a variety of sporting and entertainment events year-round. Located on approximately 13-acres in the Railyards'

East End District, the open-air stadium can be found between 8th and 10th streets north of Railyards Blvd.

Kaiser Permanente Hospital

Kaiser Permanente plans to build a state-of-the-art hospital in the Railyards, bringing major medical services to downtown. The hospital will have 420 beds and replace an ageing facility located in Sacramento County.

Sacramento County Courthouse

The 53-courtroom facility is being built to relieve crowding at Gordon Schaber county courthouse, used by the Superior Court of Sacramento County. The 566,895 sq. ft. building may be up to 18 stories tall and will include 250 parking spaces.

Central Shops

The Central Shops consist of eight historic buildings from the original Central Pacific Railroad Yard, constructed between 1868 and 1917. The Central Shops District was one of the largest industrial sites in the country in the early 20th century and played a fundamental role in the history of California and the development of the economy.

Railyards Central Shops

Railyards and Central Shops at buildout

These eight historic buildings from the original Central Pacific Railroad Yard are being adaptively reused as the centerpiece for the Central Shops District. The Central Shops District will be home to a vibrant mix of uses. This 500,000+ SF retail district will feature eateries, entertainment, art galleries, distinctive retail shops, and an expansion to the State Railroad Museum oriented around a central plaza.

The Central Shops buildings have been designated as a historic district; they are being rehabilitated and developed pursuant to historic preservation guidelines.

Housing and Mixed Use

The first Railyards mixed-use residential project, The A.J., will consist of 345 residential rental units, 69 of which will be affordable units, and 5,000 square feet of ground floor retail. The residential units will be a mix of studios, 1 bedroom and 2 bedroom units.

The Foundry consists of two six-story office and retail buildings located on "Lot 12", east of the Central Shops between Fifth and Sixth Streets. Each of the six-story buildings features ground-floor retail and restaurant space, and a shared courtyard area between the buildings accommodates potential outdoor cafe seating, living green walls, and seat walls.

Sacramento Valley Station

The <u>Sacramento Valley Station</u> has been in continuous operation as a passenger rail station since it's opening in 1926 and has grown in ridership to the nation's 7th busiest station, serving the 3rd ranked Amtrak service on the Capitol Corridor. The historic Depot Building at Sacramento Valley Station has undergone a full restoration, which includes +/-25,000 square feet of mixed-use leasable space for offices, restaurants, and retail.

There are no other major projects proposed or under construction in the Railyards at this time.

Future Projects

Railroad Technology Museum

Located in the Central Shops, the proposed 100,000 sq. ft. museum will re-purpose the historic railroad shop buildings to store locomotive and railroad car collections and museum exhibit galleries focused on railroad engineering and technology.

Future Railroad Technology Museum at the Central Shops

Central City Specific Plan Area

The Central City is the central business district of the City of Sacramento. It is currently undergoing a major revitalization phase. Included within downtown is the California State Capitol building. The major retail and entertainment area is known as the Downtown Commons (DOCO), which includes Macy's, the Sawyer Hotel, the Golden 1 Center (home of the NBA Sacramento Kings) and a wide variety of dining establishments. The Sacramento Convention Center Complex (C3 – Safe Credit Union Convention Center) is a major events venue located downtown.

Completed Projects

Central City Specific Plan

In 2015 the Downtown Housing Initiative was launched to bring 10,000 new housing units in the next 10 years to Central City Sacramento. The Central City Specific Plan takes that initiative further by looking at growth opportunities for the next twenty years and beyond. Through plan development, the City highlighted and evaluated opportunity sites ready for development. The City worked with development experts, community based interest groups, and the community at large to achieve the best plan possible through engagement tools including stakeholder meetings, community workshops, and online engagement. The Central City Specific Plan was adopted by Council in 2018.

California State Railroad Museum

<u>California State Railroad Museum</u> is North America's finest and most visited railroad museum featuring the artifacts, stories and experiences of the Central Pacific Railroad's crossing of the Sierra Mountains as part of the Transcontinental Railroad's westward march to California. It is located in the Old Sacramento Waterfront.

Golden I Center/Downtown Commons

Directly east of the Old Sacramento Waterfront is the <u>Golden 1 Center</u>, is located within the <u>Downtown Commons</u> lifestyle center, a collection of 1.5 million square feet of retail, restaurant, and entertainment venues located in downtown Sacramento. The Golden 1 Center is a 17,500 seat capacity indoor, multi-use entertainment and sports center hosting events such as professional and collegiate sports, concerts, ice shows, indoor rodeo, trade shows, large graduations, family shows, and other indoor entertainment.

C3 Project – Safe Credit Union Convention Center

The City of Sacramento and City Council, with community partners including Visit Sacramento and the Sacramento Hotel Association, have embarked on the renovation and expansion of the Sacramento Convention Center (renamed SAFE Credit Union Convention Center), the Memorial Auditorium, and the Community Center Theater (renamed SAFE Credit Union Performing Arts Center). This trio of buildings known as the Convention Center Complex (renamed SAFE Credit Convention and Performing Arts District) and their construction is called the C3 Project.

The Hardin

The project consists of 250,000 total square feet with 72,000 of those consisting of retail space, including local restaurants, retail, and nightlife. Incorporated above the retail spaces are 137 mixed-income apartments of varying sizes and rent levels, ranging from affordable studios to penthouses.

Historic Old Sacramento Waterfront

This is where the City of Sacramento began following the discovery of gold on the American River in 1848. Located at the confluence of the Sacramento and American Rivers, the historic waterfront area is where fortune seekers from around the world came to stock up on supplies before heading to the gold fields. Incorporated as a city in 1850 this area became the hub of commerce, communication and transportation in the region. Old Sacramento was the last stop on the Pony Express route, the terminus of the transcontinental railroad and housed the original California Supreme Court Chambers and California's first State Library.

Old Sacramento Waterfront and Central City

Today, it is a National Historic Landmark District and a State Historic Park encompassing 28 accessible acres and home to 53 historic buildings, the largest grouping of Gold Rush era buildings in the State of California. The original, historic quarter of the city, it is the single largest tourist attraction in the Sacramento region and is located in an Opportunity Zone. The district draws millions of locals and visitors each year seeking Sacramento's farm to fork dining scene, unique retail shops, and entertainment from museums to comedy clubs. The vast majority of businesses operating in the district are locally owned, small businesses with twenty-seven percent of the businesses being female owned and forty-five percent of businesses are minority owned. According to the U.S. Census Bureau, in 2018 eighteen percent of all United States businesses were minority-owned and almost twenty percent were women owned. The district's business minority and women-owned business statistics far exceed the national standard.

Pending Projects

Destination Sacramento

On June 27, 2017, The City of Sacramento City Council set goals for redevelopment of the Old Sacramento Waterfront to (1) create a regional destination attracting millions of people a year to the waterfront, and to (2) create a marketable asset that would assist civic efforts to increase Convention Center sales, aid efforts to attract outside businesses to the region, and help attract and retain a next-economy workforce.

Proposed Destination Sacramento Project at the Old Sacramento Waterfront

To realize these goals, staff proposed the Destination Sacramento Program which consists of several initiatives, including three capital improvement projects:

- Front Street Experience,
- Sacramento History Museum Event Deck and
- River Docks.

Destination Sacramento Projects

The City has been unable to move forward on these projects. We are hoping that this Charrette will help to identify ways to finance and implement these projects.

Front Street Experience (see details below)

The Front Street Experience consists of redeveloping the city-owned property from the Sacramento River to Front Street (preserving the rail corridor and Embarcadero) and from Neasham Circle to J Street, creating an inviting open area along the waterfront that can be reshaped for public assembly, featuring two support buildings, pop-up market and festival spaces, play areas, a stage area, public art, elevated viewing platforms, weather-protected seating, etc.

Museum Event Deck (Future Project) The Museum Event Deck on the roof of the City owned

Future Sacramento History Museum Roof Deck

Sacramento History
Museum building at the
northwest corner of Front
and J Streets would create a
premiere space for events
with views of the
Sacramento River and
Waterfront. The deck will
be accessed through a new
structure added to the rear
of the building housing
stairs and an elevator.

The space would be enhanced with seating, landscaping, a conference room, and interpretive historical displays.

River Docks (Future Project)

The River Docks included the concept of a floating barge useable as event space, stage, river

Future Improvements to the River Docks

docking, and that could, as technology developed, be used for public swimming. During the Feasibility Phase, staff determined the current technology to be insufficiently tested and instead worked to improve the existing dock system with strategic additions to improve access and use of the docks.

Program Status

On April 30, 2019, City Council approved an initial \$5,000,000 of Transient Occupancy Tax (TOT) bond funding for the Front Street Project and directed Staff to proceed with Phase 1-Feasibility for the Front Street Experience and Museum Event Deck projects to include planning level documents describing the scope of the proposed improvements, rough-order-of-magnitude cost estimates, a schedule, and an analysis describing potential returns and benefits to the City for the investment.

The City pledged TOT revenues to repay those bonds, which were issued in November 2018 for the Convention Center Complex (C3) project. In addition to the C3 project, a portion of the TOT revenue bonds may be used for projects, like the Destination Sacramento Program, that qualify under the City's TOT ordinances. It was discovered that the River Dock improvements were not eligible for TOT bond funding; therefore, the City did not proceed with design work on the project.

Additionally, the City expected to issue Sacramento Tourism and Infrastructure District (STID) bonds in Summer 2020 to further fund the project. Prior to the pandemic, it was estimated that the STID bonds, as well as other project funding sources, including the potential issuance of an additional series of TOT revenue bonds could generate up to \$42 million in excess of the amount needed to fully fund the C3 Project.

Unfortunately, due to the COVID-19 pandemic and the stay-at-home order, the City's TOT revenues were severely impacted, the funding for the project was significantly reduced to repay

other City TOT eligible obligations and the City does not have the capacity to issue the STID bonds.

At this time, Phase 1-Feasbility, Phase 2 – Planning and CEQA Review, and Phase 3A- Schematic Design have been completed for Front Street and the Event Deck but further design work has been stalled. The City has put the Event Deck project on hold. However, to continue moving the Front Street project forward and have it positioned for construction once TOT funding is restored, the City requested grant funds from the U.S. Economic Development Administration to finalize the architectural and engineering work for the public park/Front Street Experience (FSE). It is anticipated that the City will be awarded the funds in Spring 2022. However, the City has no funding to construct the project and is actively seeking opportunities to realize the project.

Front Street Experience Details

The Front Street Experience project is located on city-owned property bounded by Front Street, the Sacramento River (land side), J Street, and Neasham Circle. The project consists of public assembly areas and amenities, supported by buildings to create a public park celebrating Sacramento's common waterfront heritage. The park will be populated with programmable event spaces for visitors and the people of Sacramento to congregate along the Waterfront.

The FSE components are shown and described below:

Confluence Park

Confluence Park is 35,000 square foot open-air event area consisting of flexible open space with various activations on a regular basis. It will be suitable for popup events, festivals, games and performances ranging from small intimate gatherings to crowds of 5,000 people and more. It is bounded on the west by the Trestle.

The Trestle (Elevated Walking Structure)

The Trestle is an elevated open-air walking structure that would be approximately 600 feet in length and elevated over grade between 15 and 18 feet to allow unobstructed views of the river.

Looking north at Trestle and Confluence Park

The elevated walkway would be accessed by the stairs and elevators at both the Landing Building and Signal House Building.

Timestream

The FSE project would construct a "Time Stream" in the main plaza near Front and K Streets. The Time

Stream would consist of a light-emitting diode (LED) screen that spans approximately 120 feet between two columns that are up to 36 feet tall. The **Confluence Plaza Looking North**

during outdoor events and to project historic images or other interpretive materials relevant to

the Old Sacramento Waterfront District.

time stream could be used

Landscaping

The FSE project would plant approximately 30,000 sf of landscaping throughout the FSE project.

Lighting

The FSE project would retain or replace existing (in-kind) pedestrian lighting along Front Street and the Embarcadero. Replacement of existing streetlights and

Confluence Plaza and Timestream looking West

provision of new streetlights would be consistent with existing streetlights in the vicinity of the FSE project site. New architectural LED lighting would be anticipated to be installed throughout the FSE project site to

improve ambiance and increase safety.

Mini Sacramento

The City plans to design and construct Mini Sacramento, a children's play area, at the southern end of the site by the Old Sacramento Schoolhouse and at strategic locations along the Waterfront. The purpose of this project is to reintroduce the diversity of Sacramento through play. We anticipate engaging community groups to sponsor the design and construction of themed play structures. This project is generally outside the scope of the Front Street experience, but the design development and construction drawings for the project will include the necessary infrastructure to support Mini Sacramento.

Landing and Signal House Buildings

While not a part of the scope of this work, the City anticipates constructing two buildings to anchor the site in the future.

The proposed Landing Building would consist of a two-story (35 feet in height) assembly building in the

south portion of the FSE project site. The proposed Landing Building would be approximately 16.000 gsf

and would include approximately 6,000 sf of commercial assembly space on the ground floor and 8,000 sf of open-air assembly space on the second floor along with public restrooms and a warming kitchen for catering. The open-air assembly space would be used for convention and assembly purposes, such as rental of and use for social gatherings,

View from Signal House looking South

The Signal House Building

meetings, and events.

would consist of a two-story (35 feet in height) building in the northern portion of the FSE project site. The proposed Signal House would be approximately 4,000 gsf and would include approximately 2,000 sf of commercial assembly space on the ground floor and 2,000 sf of openair seating on the second floor along with public restrooms. The open-air assembly space would be used for assembly and seating purposes as related to the commercial assembly space.

The Landing and the Signal House, once constructed, will be connected by the Trestle.

Building and Rail Line Removal

The FSE would result in the removal of two buildings: the North and South Public Markets. These buildings are owned by the City and are not original historic structures, having been constructed in the 1970's and 1980's during the Waterfront's redevelopment. The buildings are mostly vacant.

Reconfigured Rail Line

The California State Railroad Museum Foundation (CSRMF) currently operates

a series of successful excursion trains on a State rail line located within a 20-foot railway easement immediately east of the newly constructed Embarcadero. The City will coordinate with the CSRMF to include a passenger loading area within the project and to demolish other rail lines on City property. The project proposes to relocate the Sacramento River Bikeway off the Embarcadero and install a dedicated bike lane parallel to the rail line.

There are no other major projects proposed or under construction in the Central City at this time.

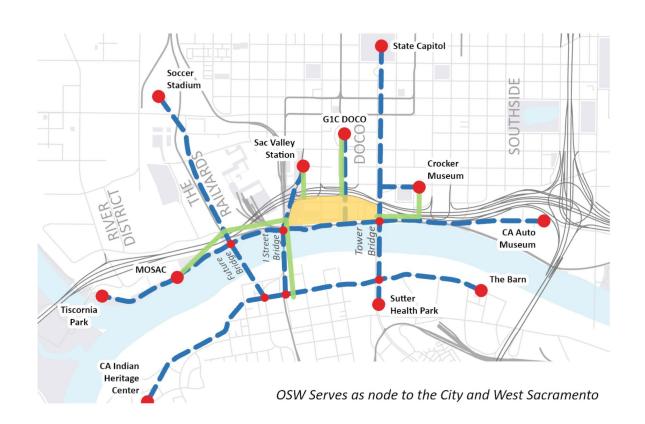

3. Transportation and Connectivity

This section provides a quick review of the connectivity between the major waterfront and downtown attractions. The first two maps show the connectivity relationship between the these attractions waterfront specific plan. The following map shows the existing and proposed transportation network.

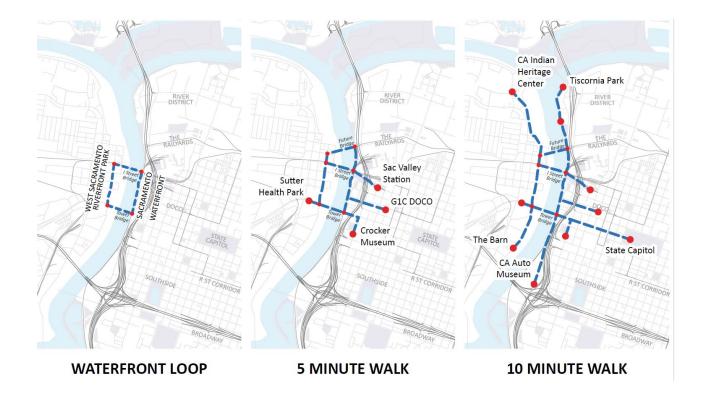

Two major transportation projects are presently being planned for:

- I Street Bridge Replacement Project and the additional pedestrian / bicycle improvements for the I Street Bridge.
- Sacramento Valley Intermodal Station.

Connectivity Between the Major Waterfront and Downtown Attractions

I Street Bridge Replacement Project

The <u>I Street Bridge Replacement Project</u> will include the construction of a new bridge upstream of the existing I Street Bridge. The bridge will provide a new connection across the Sacramento River between

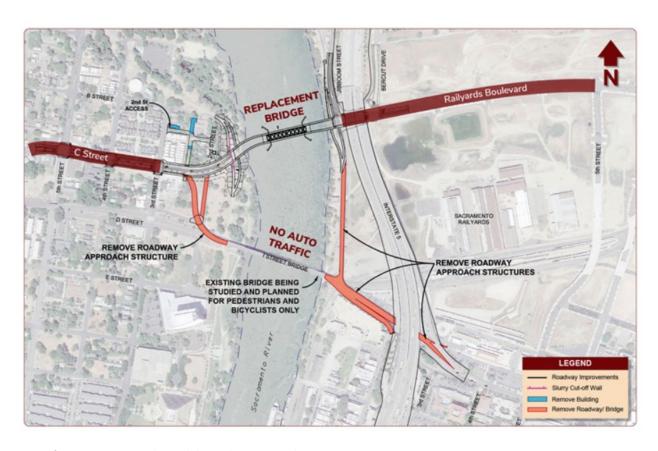

the Sacramento Railyards and the West Sacramento Washington
Neighborhood planned developments. It will serve automobile, bicycle, transit, and pedestrian users. The existing I Street Bridge's lower deck will continue to serve as a railroad crossing, and the upper deck is currently being studied and planned

Newly Design I Street Bridge

for use by pedestrians and bicyclists. The approach viaducts on Jibboom Street to the existing I Street Bridge

will be demolished, resulting in better access to the waterfront in both cities.

Map of Existing I Street Bridge and the Replacement Bridge

Sacramento Valley Station Area Plan Vision

The Sacramento Valley Station (SVS) will expand to the SVS Transit Center as both a hub for the six-county Sacramento region and a hub connecting the northern California mega-region, from Reno, through Sacramento, to the Bay Area and Central Valley, as well as counties north to Butte, Tehama and Shasta Counties. The site will serve as a connector, linking to local assets within and beyond the Station area, including the Railyards Central Shops, Downtown, Old Sacramento and the Sacramento River and trails as well as a destination with transit supportive uses and purposeful public open space.

The master plan envisions a sustainable district that can embark on the foremost policies of the Railyards Specific Plan to position the Railyards as a national leader in sustainable development. This project would serve as a model of how a downtown district can achieve both resource efficiency and cost effectiveness, quality of life and environmental benefit, historic preservation, and a living future. It takes inspiration from the City's pioneering work to combat climate change.

Timeline (dependent on securing funding)

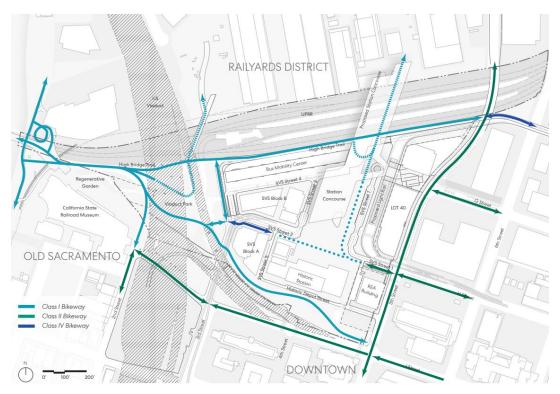

2023, Winter - North Entrance to Railyards Central Shops Plaza

2024 - H Street Cycletrack to SVS

2026 – Relocate Light Rail Station, new Pick-up Drop Off

2028, Winter - Bus Mobility Center Completion target

Includes Bikeway to Historic I Street Bridge

4. Sacramento Waterfront History Background

The Sacramento Waterfront has been utilized by humans for thousands of years. But in recently history, the waterfront played a key role in opening the American west of the nation and the world. Not only is the waterfront important on a national scale, it was the foundation of the City of Sacramento. It is here that Sacramento became the indominable city, rebuilding after floods and fires, and the site of many of the City's most colorful historic storylines.

Native Americans

Native Americans, including the Nisenan and Maidu tribes, have a long history of inhabiting the land in the Sacramento Valley. The tribes prospered along the Sacramento River, taking advantage of the abundance of resources the river had to offer.

Gold Rush

With the discovery of gold at Sutter's Mill in 1848, Sacramento's waterfront exploded with activity. Ships filled with goods for Sacramento's merchants and the northern California gold mines were arriving daily. Would-be gold miners arriving in California by ship made their final landfall at Sacramento and headed into the Gold Country. The waterfront was so busy, by 1850 it was common practice to tie up surplus sailing vessels along the embarcadero for storage purposes and sell goods directly from the vessel.

Flooding and Fires

In January 1850, a major flood devastated the city. The American and Sacramento Rivers crested at the same time and flooded the City. Two more floods inundated the City in March and December of 1850, prompting the construction of levees.

The first significant fire in the City occurred in 1850 and destroyed several buildings just east of the waterfront. In November 1852, the City caught fire again and 85% of the City was destroyed. The City was rebuilt with buildings constructed of brick instead of wood.

The flood of March 1861 caused widespread flooding, however, the winter of 1861-1862 saw the worst flooding in the history of the Sacramento. The devastation of these floods kept the city and county under water for three months would permanently change the city's landscape. The City altered the course of the American River moving it away from the central business area and it raised its streets and buildings to create a flood wall to permanently protect the city from another flood of this scale.

Transportation

The Sacramento Waterfront was a hub of wagon train, steamboat and sailing vessel, and railroad transportation. In the 1860's, Sacramento transportation transitioned from primarily wagons to an industrial age transportation system. By 1869, the transportation evolution would result in a transcontinental railroad, across the nation, and a network of steam ships that connected Sacramento to China, the eastern states, and the whole world.

The Sacramento River was a major route for steamboats traveling between San Francisco and Sacramento with many large ships in operation. These ships docked at the embarcadero and delivered passengers and goods to the Sacramento Waterfront which were then transported by wagons to the surrounding area and gold mines. The ships, wagons, and waterfront facilities to serve them, created a bustle of activity.

A coast-to-coast railroad was made a necessity by the Civil War. In July 1862, Abraham Lincoln signed the Pacific Railroad Act authorizing the Central Pacific Railroad to build east from Sacramento and the Union Pacific Railroad to build west from the Missouri River. The railroad broke ground on the transcontinental railroad at Front and K Streets. This railroad was one of the greatest construction efforts of the 19th century and linked California to the rest of the nation.

Communication and Innovation

The Pony Express came to Sacramento in 1860. Prior to the Pony Express, mail from the east coast took 6 months to reach California as letters were delivered via ship around South America's Cap Horn. The Pony Express delivered mail from the east coast to Sacramento in 10 days and was the first trans-continental communication.

The Pony Express was in operation for eighteen months and but became obsolete upon the arrival of the First Transcontinental Telegraph. By 1861, Sacramento was linked to the telegraph lines on the other side of the continent.

Industrial Waterfront

By the end of the 1870s the Old Sacramento area was already changing in character from the City's central business district to a warehouse area. The Central Pacific demolished it old freight and passenger buildings along Front Street and replaced them with huge freight sheds. Warehouses dominated the waterfront through the 1950's.

Skid Row

In the 1960's, the Sacramento Waterfront had become a blighted area and home to the City's skid row. It was a collection of flophouses, bars, diners and pawn shops. This blighted area was further exacerbated by the construction of Interstate 5, which created a physical barrier between the waterfront and associated buildings and the remainder of the City.

Redevelopment

In the 1950's people began to realize the significance of this area. Redevelopment and revitalization of Old Sacramento to the north of the Tower Bridge began in the 1960s. The Old Sacramento State Historic Park (OSSHP) was founded in the 1960's to ensure preservation of this historically significant area and providing an authentic scene of the gold rush area between 1849 and 1870. Additionally, in 1965, Old Sacramento received a National Historic District designation.

5. Sacramento Docks Area Draft Specific Plan and West Broadway Specific Plan Background

The information provided on the Sacramento Docks and West Broadway Specific Plans is for background information only. The charrette is not focusing on these areas.

Sacramento Docks Area Draft Specific Plan Area

Promenade

The Promenade runs south from the Tower Bridge along the riverfront and consists of a bike trail, historical markers, and lighting.

Promenade Looking North Towards the Tower Bridge and Old Sacramento Waterfront

Crocker Art Museum

The <u>Crocker Art Museum</u> serves as the primary regional resource for the study and appreciation of fine art. The Museum campus consists of the historic Crocker Family Mansion and the modern

Crocker Art Museum

Teel Family Pavilion. It is the only museum in the Sacramento region accredited by the American Alliance of Museums.

The museum is currently working on a plan to enhance the adjacent park with an event space to allow for outdoor programming.

Crocker Art Museum and Crocker Park

Docks

The waterfront area, along the Sacramento River, holds tremendous potential for future development opportunities. Located along one of the major rivers that run through Sacramento, it is an area envisioned as a development project to reshape and add to Sacramento's

Docks Area Showing Ownership

waterfront. The area consists of properties owned by the City of Sacramento, California State Parks and PG&E. The California Auto Museum is located on the largest of the City-owned parcel.

California Auto Museum

The <u>California Auto Museum</u> has a large collection of cars ranging from early models to muscle cars. The mission of the Museum is to preserve, exhibit, and teach the story of the automobile and it's influence on our lives. It is the first automobile museum in the west to be established in perpetuity.

Exhibit at California Auto Museum

Northwest Land Park Specific Plan Area

Miller Regional Park

<u>Miller Regional Park</u> is a 40-acre park along the Sacramento River, adjacent to the Sacramento Marina. The park amenities include a dock, picnic areas, and river access.

Sacramento Marina

The <u>Sacramento Marina</u> is a 475-slip public marina at the southern end of Front Street, nestled behind beautiful Miller Park on the east side of the Sacramento River. As the largest, most convenient and only off-river dockage marina in the Sacramento area, our location is an ideal one for docking boats and enjoying the waterways.

Miller Park and Marina showing Ownership

Broadway Bridge

The cities of West Sacramento and Sacramento are developing preliminary engineering concepts for a new bridge, the <u>Broadway Bridge</u>, across the Sacramento River downstream of the Pioneer Bridge. The bridge will connect South River Road on the west landing and Broadway on the east landing.

Tank Farms

ConocoPhillips and Chevron have petroleum tank farms in this area. The tank farms are currently in operation and there are no plans to phase out operations.

6. City of West Sacramento Riverfront Background

The <u>City of West Sacramento</u> encompasses approximately 22 square miles, with a population just over 51,000 people. The City is bounded by the Sacramento River on the east and is directly across the river from the Sacramento Waterfront. The riverfront area, called the Bridge District, is rapidly developing. At full build out, there will be 4,000 residential housing units in this area along with offices and retail. Plans are underway for a streetcar line that will connect the city's core with the Bridge District and state capital Sacramento.

Sutter Health Park (formerly Raley Field)

<u>Sutter Health Park</u>, home of the River Cats, the AAA affiliate of the San Francisco Giants, anchors the area. The stadium was opened in 2000. The stadium has a total capacity of 14,014. In additional to hosting baseball games, it is also used as a concert venue and for other events.

The Barn and Riverfront Outdoor Art

<u>The Barn</u> is an indoor/outdoor events venue located in the Bridge District. It is an iconic structure located adjacent to the Sacramento River. In the same area at The Barn, there is the first of many pieces of <u>Riverfront Outdoor Art</u> which will eventually line the riverfront.

California Indian Heritage Center

The <u>California Indian Heritage Center</u> recently received \$100 million in funding to construct a new museum in West Sacramento near the confluence of the Sacramento and American Rivers. The existing museum is located in Sacramento, near Sutter's Fort, and is committed to honoring California Native American culture.
